Hi Donn and Gary,

Can you please update the CAC on the schedule of the remedy proposal for the Waste Pits? At the last CAC meeting the CAC was told by the EPA that the remedy proposal would come on July 28 and I am now hearing that I should not refer to that date we received, rather "late summer" for the proposal.

It is very important to me that I produce accurate information and when I've referred to the July 28 proposal date, I have simply been referring to the latest information I have received from the agency. If July 28 is in fact not the proposal date, please advise the CAC so that we can produce accurate information.

Thank you,
Jackie Young
